OPTICS	
Kit with all diffusers	EFFI-FLEX-LG-XXXX-ZZZ-**KIT** The light is delivered assembled in the default configuration with the lens plate positioned at Position 2 (25°) and the Lightly-diffusive window.
Polarizer accessory	EFFI-FLEX-LG-XXXX-ZZZ-WW-PP-**POL**
Custom wavelength	EFFI-FLEX-LG-1000-**ZZZ**-WW-PP Other wavelengths upon request. *Please contact Effilux.*
ELECTRONICS	
Customized software (Strobe length & frequency modification)	EFFI-FLEX-LG-XXXX-ZZZ-WW-PP-**SWxxxxxx** Specific reference xxxxxx for each customized software. *If the device consumption exceed 150W, regulations' compliancy may be impacted, please contact Effilux.*
External power supply Version	EFFI-FLEX-LG-XXXX-ZZZ-WW-PP-**CPW**-SWxxxxxx Customized software mandatory. *Please contact Effilux.*
Daisy Chain Version	EFFI-FLEX-LG-XXXX-ZZZ-WW-PP-**CHS** Number of chainable bars depending on the software version, see Annex. *Please contact Effilux.*
Daisy Chain Version with output female connector on the opposite cap	EFFI-FLEX-LG-XXXX-ZZZ-WW-PP-**CHO** Number of chainable bars depending on the software version, see Annex. *Please contact Effilux.*
NPN trigger Version	EFFI-FLEX-LG-XXXX-ZZZ-WW-PP-**NPN** NPN trigger on pin 2 instead of PNP trigger on pin 4
MECHANIC	
Longer length (Up to 2800mm)	EFFI-FLEX-LG-**XXXX**-ZZZ-WW-PP *If the device consumption exceeds 150W, regulations' compliancy may be impacted, please contact Effilux.*

effiFLEX-LG

Illumination Mode	Ultra High-Power Strobe *(Strobe only)*			
Wavelengths	465nm, 625nm, 850nm (+/- 5%) *(Other wavelength upon request)* White (5500K ±500K)			
Power Supply	24V DC +/- 10%			
Connector configuration	**Standard**	**CPW**	**CHS**	**CHO**
Connector(s) INPUT (male)	M12 - 5pins or M12Power (T-Coded) - 4pins	**MAIN**: M12 - 5pins **AUX**: M12 - 5pins or M12Power - 4pins	M12 - 5pins or M12Power - 4pins	M12 - 5pins or M12Power - 4pins
OUTPUT (female)	None	None	M12 - 5pins or M12Power - 4pins (same than INPUT)	M12 - 5pins or M12Power - 4pins (same than INPUT)
Power Consumption Average	Approx. 20W for each 200mm - See page 6 *(Can be modifed via customized software)*			
Peak (Max.)	6A max for XXXX ≤ 800mm - 12A max for XXXX ≤ 1600mm - 18A max for XXXX ≤ 2400mm - See page 6 Exact value indicated on the product label *(Can be modifed via customized software)*			
Built-in driver version	MegaStrobe™ feature			
Response Time	< 1µs			
Frequency	Internal Frequency protection: 150Hz Max (Standard electronical configuration) *(Can be modified via customized software)*			
Strobe duration	Internal Strobe length protection: 400µs Max (Standard electronical configuration) *(Can be modified via customized software)*			
Input signal	PNP trigger input: Light ON: from 4V to 24V / Max. signal consumption: 2mA *(Option NPN: Light ON: from 0V to 1.5V / Max. signal consumption: 2mA)*			
Weight	Please refer to General Drawing			
Dimensions	60mm x 47mm x Length = Optical length + 35mm (Please refer to General Drawing)			
Material	Device body: Aluminum alloy & ABS / Window and caps: PMMA			
Fastener	One T-slot on the back for M6 T-nuts 8mm slot (2x M6 T-nuts included)			
IP rating	IP5X (dust protected)			
Operation environment	Temperature: 0°C to 40°C - Humidity: 20 to 85%RH (with no condensation) - Altitude: Up to 2000m			
Storage environment	Temperature: -20° to 60°C - Humidity: 20 to 85%RH (with no condensation)			
Informations	Overvoltage category I - Protective class III - Pollution degree 3			
Regulations & Marking	CE - UKCA - FCC - ICES-3/NMB-3 - cTÜVus (The supply of the device has to fulfill SELV and Limited Energy according IEC 61010-1 9.4)			
Environmental Standards	RoHS Directives (2011/65/EU, 2015/863/EU and China RoHS) - REACH Regulation - WEEE Regulation			
Country of Origin	France			

OPTICAL SPECIFICATIONS

MANY POSSIBLE CONFIGURATIONS IN JUST ONE LIGHT

### Diffusers

LD : Lightly-diffuse   SD : Semi-diffuse   OP : Opaline

Depending on the uniformity needed for the application, the user can easily change the diffuser to one that fulfills the application requirements.

Lens position

The EFFI-Flex-LG offers flexible lens positioning to control the beam angle. The user can adjust it by himself: the angle can be widened by moving the lens closer to the LEDs or narrowed by moving the lens further away from the LEDs.

90°	45°	25°	10°
P0 (without lens)	P1	P2	P3

How to change the optical configuration of your EFFI-Flex-LG?

The EFFI-Flex-LG offers flexible lens positioning to control the beam angle and different type of diffusers to adapt the uniformity. The user can easily change the diffuser and the lens position.
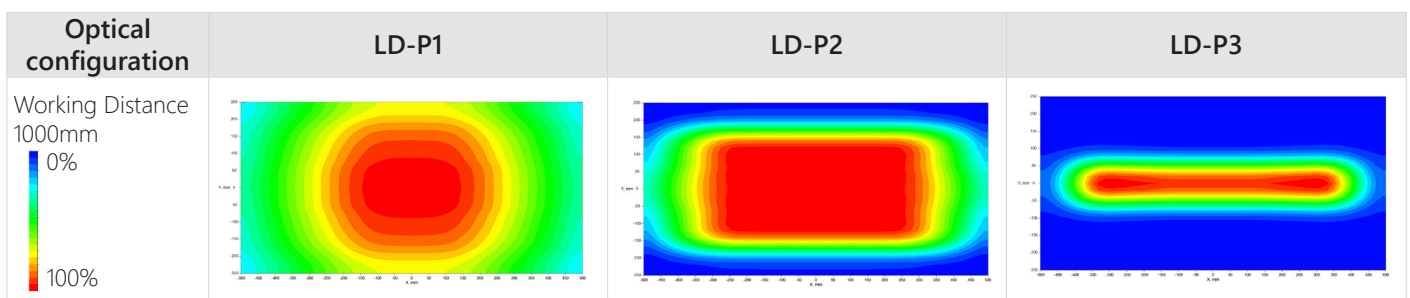

Unscrew the M4 screws and remove the cap (without connector)   Slide out the window and all lenses   Place the lenses & window in desired configuration
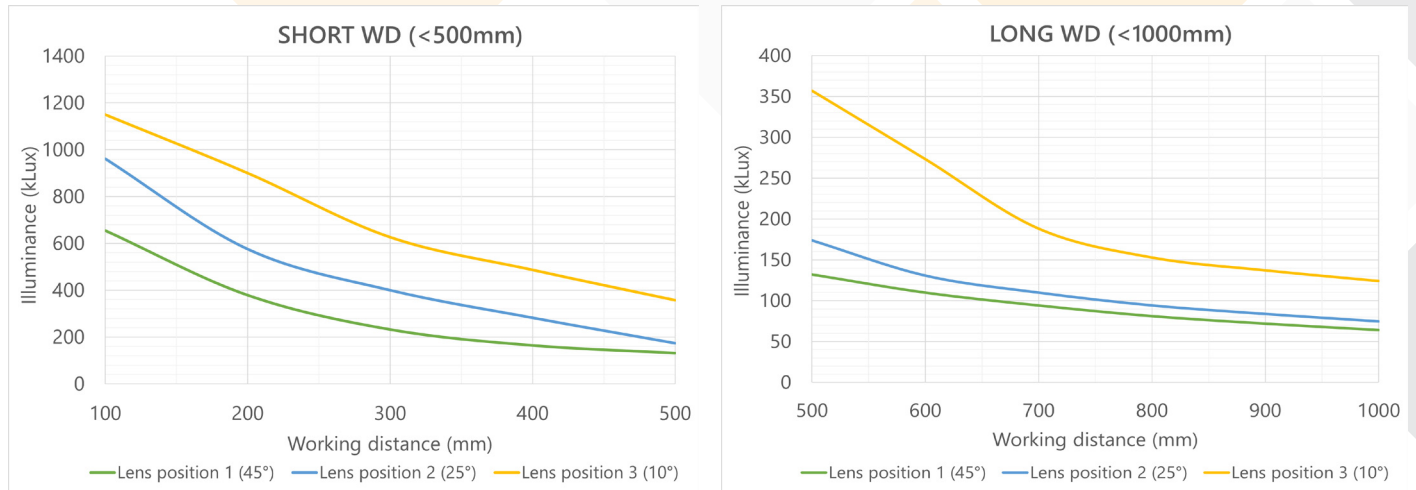

OPTICAL IMPACT

Lens position VS Illuminated area

Optical configuration	LD-P1	LD-P2	LD-P3
Working Distance 1000mm 0% 100%			

OPTICAL IMPACT

Lens position VS Illuminance

SHORT WD (<500mm)
- X-axis: Working distance (mm)
- Y-axis: Illuminance (kLux)
- Lens position 1 (45°) — Lens position 2 (25°) — Lens position 3 (10°)

LONG WD (<1000mm)
- X-axis: Working distance (mm)
- Y-axis: Illuminance (kLux)
- Lens position 1 (45°) — Lens position 2 (25°) — Lens position 3 (10°)

Note: Measurement done with a White 800 mm light, LD window

OPTION: POLARIZER ACCESSORY

Using polarizers, on the Effilux light and on the camera, it is possible to eliminate glare from your workpiece making it easier to acquire a suitable image for the application.

The user can insert directly the polarizer inside the EFFI-Flex-LG, under the window.

Without polarizer

With polarizer

Important note: The polarization is optimal with an LD window, the use of diffuser (SD or OP) can depolarize the light.

ELECTRONICAL SPECIFICATIONS

Wiring layout - Standard connector version

- The EFFI-Flex-LG requires 24V DC input power.
- The trigger pin needs to be connected to a PNP trigger signal.
- If a continuous signal is applied to the PNP trigger pin, the output light is strobed by default at maximum Frequency and Strobe length (150 Hz - 400 µs), although it appears continuous for human eye.

Power consumption & connector definition

The EFFI-Flex-LG integrates **boosters technology** to limit the power consumption.

Depending on the average power consumption, the EFFI-Flex-LG comes with a **standard M12 connector** or an **M12 Power T-coded connector**. The values below are maximum values, the exact power consumption of the product is always indicated on the product label.

MAX POWER CONSUMPTION (+/- 5%) at 150Hz - 400µs (Red version - Standard software - 2 meters cable)													
Optical Length XXXX (mm)	200	400	600	800	1000	1200	1400	1600	1800	2000	2200	2400	2600	2800
Average power consumption	20W	40W	60W	80W	100W	120W	140W	160W	180W	200W	220W	240W	260W	280W

**Note:** These values may change for the products with a customized software.

M12 5 pins	M12 Power 4 pins

Initialization phase

When EFFI-Flex-LG is supplied, the product first enters in a few seconds initialization phase. This initialization is a sequence of very short strobes of increasing intensity. Please wait until the end of this initialization to use the product (max 5 seconds).

MegaStrobe feature

The integrated driver with MegaStrobe feature allows Ultra high-power strobes.

Output Intensity

1500%

Strobe length
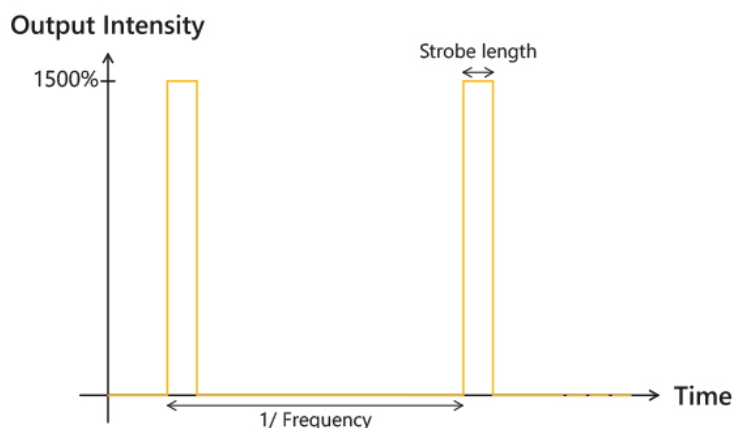

1/ Frequency

Time

MegaStrobe	
Strobing time (internal protection)	400µs max
Frequency (internal protection)	150Hz max
Rising time	<1µs
Falling time	<2µs

# ACCESSORIES

SmartSense Function

The EFFI-Flex-LG CPW version has 2 operating modes and 2 M12 connectors.

Depending on the wiring, the light can be used either with direct connection to the camera or with an additional external power supply for longer strobes.

A custom software is needed to define those two specific modes, depending on the camera and external power supply characteristics.
MAIN CONNECTOR (camera)

AUXILIARY CONNECTOR (ext. power supply)

The EFFI-Flex-LG CPW detects **automatically** the operating mode, Thanks to this **SmartSense** function, the user can easily shift from standard mode to power mode (longer strobes) just by connecting the additional power supply:

- **Mode 1** (Direct connection): Connect only the **Main connector** to the camera.
- **Mode 2** (Longer strobe pulse): Connect also the **Auxiliary connector** to an external power supply.
Mode 1

Mode 2

CAM

CAM

POWER SUPPLY

Wiring layout - External power supply connector version

The EFFI-Flex-LG CPW requires 24V DC input power. Note the trigger pin needs to be connected to a PNP trigger signal.

DAISY-CHAIN CONFIGURATION

You can chain several EFFI-Flex-LG-CHS by connecting the output connector directly to the next EFFI-Flex-LG bars. The EFFI-Flex-LG-CHS / EFFI-Flex-LG-CHO requires the use of a standard 5 pin M12 cable (or a 4 pins M12 Power cable depending on the product's connector) to effectively chain the lights.
The number of bars possible to chain depends on the product software and the cables' length.

With the standard software and 1 meter cables, the number of chainable products is:

Connector configuration (OUTPUT connector with the same pinout specification than INPUT connector)		Max number of chainable product VS Size						
INPUT Connector	OUTPUT Connector	200mm	400mm	600mm	800mm	1000mm	1200mm	1400mm
1x M12 - 5 pins male	1x M12 - 5 pins female	4	2	X	X	X	X	X
1x M12P - 4 pins male	1x M12P - 4 pins female female	14	7	4	3	2	2	2
