Alecs - The all-in-one machine vision solution

Alecs G1-510 NX16 with Sony IMX548 runs 81 frames per second at 5.1 MP resolution.

Alecs integrates **Alvium CSI-2 technology** with NVIDIA® Jetson Orin™ System on Modules (SoM) in a robust IP67 housing. Leveraging NVIDIA's computing capabilities and Alvium's comprehensive feature set, this new machine vision system supports a wide range of applications, including complex AI algorithms.

NVIDIA® Jetson Orin™ NX16 – 16 GByte RAM with power modes up to **25 W**

- Deep Learning Accelerator (DLA) with dedicated cores offloading the hosts' CPU and GPU
- Programmable Vision Accelerator (PVA) with dedicated cores to extend the Alvium BSP feature set by NVIDIA vision libraries
- Ideal for advanced AI models and compute-intensive edge detection

Alecs G1-510 NX16 includes an IP67 lens tube to suit recommended 5 MP lenses.

Alecs G1 comes with **128 GByte NVMe storage**, providing sufficient space for AI models, datasets, and application software. For seamless software integration, the Board Support Package (BSP) is built on Vimba X and NVIDIA JetPack SDKs, offering compatibility with a wide range of popular third-party image processing libraries. Alecs features a recovery mode, ensuring the camera remains in a defined state even in case of errors.

Choose from two access modes:

- **GenICam for CSI-2 Access** directly uses the Alvium CSI-2 driver and CSI-2 transport layer (TL) to control the camera by GenICam features.
- **Video4Linux2 Access** utilizes the established V4L2 API for applications like GStreamer or OpenCV.
