Spyder2 S2-1x-xxx40

Line Scan Cameras

Key Features

- Resolutions from 512 to 2k
- High responsivity
- Base Camera Link™
- 8 or 10 bit selectable output
- Single 12 V to 15 V power supply
- Compact design

Programmability

- Programmable pixe to pixel correction
- Adjustable analog and digital gain and offset
- 8 or 10 bit selectable output
- Adjustable integration time and line rate
- Test pattern, line statistics, and camera diagnostics

Typical Applications

- Web inspection (multi-cam and narrow web)
- Pick and place
- Document scanning
- Flat panel display inspection

Overview

The Spyder2 is powerful yet very cost effective.

The Spyder2 is a small, fast, and cost effective camera boasting a full feature set and a Camera Link $^{\text{TM}}$ interface. The Spyder2 surpasses its predecessor in responsivity and programmability, requires less lighting, and offers precise control over key performance variables such as gain and offset. With a single tap operating at 40 MHz, the Spyder2 provides the throughput your application requires with no compromise to image quality. For those OEMs migrating from the original Spyder, the Spyder2 does not require a new optics design because pixel size and fill factor remain unchanged from the original Spyder at 14 μ m and 100% respectively.

In addition to its high performance and affordability, the Spyder2 also incorporates advanced features such as flat field correction and CDS (Correlated Double Sampling). All resolutions provide appropriate, readily available standard lens options (C mount and F mount).
